General Dental Treatment Consent Form

Thank you for choosing our office for your dental care. We will work with you to help achieve excellent oral health. While recognizing the benefits of a pleasing smile, and teeth that function well, you should be aware that dental treatment has some inherent risks. They are seldom great enough to offset the benefits of treatment but should be considered when making treatment decisions.

Benefits of dental treatment can include: relief of pain, the ability to chew properly, and the confidence in social situations that only a pleasing smile can bring! Nonetheless, there are some common risks associated with virtually any dental procedure, including:

1. Drug or chemical reaction. Dental materials and medications may trigger allergic or sensitivity reactions.
2. Long Term numbness (paresthesia). Local anesthetic, or its administration, while almost always adequate to allow comfortable care, can result in transient, or in rare instances, permanent numbness.
3. Muscle or joint tenderness. Holding one's mouth open can result in: muscle or jaw tenderness or (in a predisposed patient) precipitate a TMJ disorder.
4. Sensitivity in teeth or gums, infection or bleeding.
5. Swallowing or inhaling small objects.

While we follow procedural guidelines which most often lead to a clinical success, just like in any other pursuit in health care, not everything turns out the way it is planned. We will do our best to assure that it does. Please feel free to ask any questions in regard to all dental procedures that are recommended to you.

I have read and understand the statement on this page:

Patient Signature

Date

Parent's Signature (if patient is a minor)

Date
